

## Authorship Guidelines

The Journals Division at Human Kinetics limits the number of authors for each published manuscript to six. Only individuals who have made a substantial contribution to the manuscript, as described below, should be credited as coauthors, and the inclusion of additional authors will only be considered if all meet the following requirements:

The Journals Division at Human Kinetics adheres to the criteria for authorship as outlined by the International Committee of Medical Journal Editors\*:

Each author should have participated sufficiently in the work to take public responsibility for the content. Authorship credit should be based only on substantial contributions to:

- (a) conception and design, or analysis and interpretation of data; and
- (b) drafting the article or revising it critically for important intellectual content; and
- (c) final approval of the version to be published.

Conditions a, b, and c must *all* be met.

Individuals who do not meet the above criteria may be listed in the acknowledgements section of the manuscript.
